Frequently Asked Questions regarding our HellFire® Kit

- **Why the clear-coat, what's the deal?**
 - Our customer base is looking for a complete system (like Nohr-S®), this is it
 - Customers who want to purchase HellFire® by the can, can still do so
 - This kit offers a more esthetically pleasing appearance vs. HellFire® neat
- **How does this clear-coat stand up?**
 - It is HellFire®, without the metal additive and pigment
 - It is very strong and has excellent UV stability
- **Is this truly a DIY project?**
 - Yes, with good research and preparation a first time user can be very successful
 - Most of our kit customers are first-timers!!
- **I have a 420 sq ft project size, can I stretch the 325-400 sq ft kit?**
 - Don't risk not having enough, always round up to the next kit size.
- **I have a 2000 sq ft space? How do I order?**
 - Simply select quantity of (2) on the 926-1100 sq ft kit.
- **Do I need a primer?**
 - Only if you have an extremely porous slab, then consider a coat of Standard Primer/Coating
- **How about prep?**
 - Unsealed, unsullied floors, newer: acid etch (**check out our HD357 ETCH**)
 - Sealed, contaminated or older surfaces: grind (**keep in mind coverage will lessen, 10-15%**)
- **How fast does it ship?**
 - Hellfire® order ship the following business day in most cases
